

OARS HS

Hydrating Surfactant

GENERAL INFORMATION

OARS HS is a hydrating surfactant which aids in controlling soil water repellency and helps provide uniform soil moisture and increased soil moisture retention. When used as directed, **OARS HS** is safe to turf and can be applied at any time of the year to avoid the detrimental impact of water repellency stress and localized dry spots on turf and to increase the vigorous appearance of turfgrass. **OARS HS** is easy to apply through standard spray application equipment to all turfgrass areas.

CONDITIONS OF SALE

WARRANTY AND LIMITATION OF LIABILITY

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with the stated directions under normal conditions of use. Buyer assumes the risk of any use contrary to such directions. Seller makes no other express or implied warranty of FITNESS or of MERCHANTABILITY, and no agent of Seller is authorized to do so except in writing with a specific reference to this warranty. In no event shall Seller's liability for any breach of warranty exceed the purchase price of the material as to which a claim is made.

AQUA-AID GUARANTEE

OARS HS comes with a 100% money back guarantee. If you are not satisfied with OARS HS for any reason after trying the product at recommended rates, AQUA-AID Solutions will refund your money in full.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

Product may darken or discolor with no adverse effect to efficacy.

STORAGE AND DISPOSAL

Keep container tightly closed. Store in original container only. Triple rinse container and empty rinse water into spray or stock tank. Dispose of empty containers in accordance with applicable laws.

MADE IN USA

NET CONTENTS

PFC 3B - Inorganic Soil Improver

Dry matter content. 35,90% by mass

Ingredients

94,0% Polyoxyalkylene polymers¹

Where ¹ CMC 1 virgin material substances and mixtures

DIRECTIONS FOR USE

Golf, Lawns, and Sports Turf

Apply 13 to 16 L/ha in 800 L of water (4 to 5 ounces per 1.000 ft² in 2 gallons) at 30 day intervals or as needed. After an initial 16 L (5 ounce) application, drought conditions can be best managed by applying 6 to 8 L/ha in 800 L of water (2 to 2.5 ounces per 1.000 ft² in 2 gallons) at 15 day intervals or as needed.

For extreme drought conditions with high temperatures and/or increased soil water repellency, apply 20 to 25 L/ha in 800 L of water (6 to 8 ounces per 1.000 ft² in 2 gallons) at 30 day intervals or as needed.

Irrigate with sufficient water to deliver **OARS HS** to the soil profile - 3 mm (1/8 inch) or more recommended.

DO NOT combine **OARS HS** in the spray tank with pesticides or fertilizers unless prior use has shown the combination physically compatible, effective and non-injurious under local conditions.

HAZARD STATEMENT(S)

The product is not classified as hazardous. No known significant effects or critical hazards.

PRECAUTIONARY STATEMENT(S)

Keep out of reach of children. Read label before use. In case of eye contact, flush eyes with water. If swallowed, give water or milk. If eye or skin irritation occurs or you feel unwell, get medical advice/ attention.

Boden-Netzmittel

DE

Wirksubstanzen:

PFC 3B - Anorganischer Bodenverbesserer

Dry matter content. 35,90% by mass

Wirksubstanzen:

94,0% Polyoxyalkylene polymers1
Where 1 CMC 1 virgin material substances and mixtures

DOSIERUNG

Golf-, Sport- und Landschaftsrasenflächen

Verwenden Sie 13 bis 16 Liter pro Hektar mit 800 Liter von Wasser in Intervallen von 30 Tagen. Trockenheit wird am besten durch die Verwendung von 6 bis 8 Litern pro Hektar mit 800 Liter von Wasser in Intervallen von 15 Tagen behandelt.

Bei extremer Trockenheit mit hohen Temperaturen und/oder gesteigerter Wasserabweisung im Boden verwenden Sie 20 bis 25 Liter pro Hektar mit 800 Liter von Wasser in Intervallen von 30 Tagen.

Ausreichend Wasser verwenden, um OARS HS in das Bodenprofil einzuregnen – empfohlen werden 3 mm oder mehr.

Das Produkt ist nicht als gefährlich eingestuft.

Surfactante hidratante de suelo

ES

Ingredientes activos:

PFC 3B - Enmienda del suelo inorgánica

Dry matter content. 35,90% by mass

Ingredientes activos:

94,0% Polyoxyalkylene polymers1
Where 1 CMC 1 virgin material substances and mixtures

DOSIS DE APLICACIÓN

Golf y césped deportivo

Aplicar de 13 a 16 litros por hectárea en 800 l. de agua a intervalos de 30 días. En situaciones de sequía, lo ideal es aplicar de 6 a 8 litros por hectárea en 800 l. de agua a intervalos de 15 días.

En situaciones de sequía extrema con altas temperaturas y/o mayor capacidad de aislación hidrofuga de la tierra, aplicar de 20 a 25 litros por hectárea en 800 l. de agua a intervalos de 30 días.

Regar con agua suficiente para suministrar OARS HS al perfil de la tierra: se recomienda 3 mm o más.

El producto no está clasificado como peligroso.

Agent hydratant tensioactif du sol

FR

Ingrédients actifs :

PFC 3B - Amendement inorganique du sol

Dry matter content. 35,90% by mass

DOSE D'APPLICATION

Gazons sportifs et d'ornement

Verser 13 à 16 litres par hectare dans 800 L d'eau à intervalles de 30 jours. Les conditions de sécheresse peuvent être mieux gérées en utilisant 6 à 8 litres par hectare dans 800 L d'eau à intervalles de 15 jours.

Pour des conditions de sécheresse extrême avec des températures élevées et/ou l'imperméabilité accrue du sol, utiliser 20 à 25 litres par hectare dans 800 L d'eau à intervalles de 30 jours.

Irriguer avec suffisamment d'eau pour livrer OARS HS dans le sol - 3 mm ou plus recommandé.

Ce produit n'est pas classé comme dangereux.

Surfactante idratante del suolo

TASSO DI APPLICAZIONE

Campi da golf, campi sportivi o prati

Utilizzare da 13 a 16 litri per ettaro in 800 litri d'acqua a intervalli di 30 giorni. In situazioni di siccità, l'ideale è applicare da 6 a 8 litri per ettaro in 800 litri d'acqua a intervalli di 15 giorni.

In situazioni di siccità estrema con alte temperature e/o maggiore capacità di isolamento idrorepellente del terreno, applicare da 20 a 25 litri per ettaro in 800 litri d'acqua a intervalli di 30 giorni.

Irrigare con sufficiente acqua per fornire OARS HS al profilo del terreno: si consiglia di 3 mm o più.

Il prodotto non è classificato come pericoloso.

TOEPASSINGSHOEVEELHEDEN

Golf-, sport- en gazongrass

Gebruik 13-16 liter per ha, in 800 liter water en met een interval van 30 dagen. In extra droge weersomstandigheden gebruikt u het best 6-8 liter per ha, in 800 liter water, met een interval van 15 dagen.

In extreem droge weersomstandigheden, bij hoge temperaturen en/of verhoogde waterafstotendheid van de bodem, gebruikt u 20-25 liter per ha, in 800 liter water en met een interval van 30 dagen.

Irrigeren met voldoende water om OARS HS aan het bodemprofiel toe te voegen - 3 mm of meer is aanbevolen.

Het product is niet geclassificeerd als gevaarlijk.

TAXAS DE APLICAÇÃO

Campos de golfe, campos desportivos e relvados

Aplique entre 13 e 16 litros por hectare diluídos em 800 litros de água uma vez por mês (30 dias). Em condições de seca, pode aplicar entre 6 e 8 litros por hectare diluídos em 800 litros de água quinzenalmente.

Em condições de seca extrema com temperaturas elevadas e/ou solo com maior repelência de água, aplique entre 20 e 25 litros por hectare diluídos em 800 litros de água uma vez por mês.

Regue o terreno com água suficiente para que o OARS HS atinja o perfil do solo - recomendamos 3 mm.

O produto não está classificado como perigoso.
